

ZDRAVKO HRISTOV

LinkedIn: www.linkedin.com/in/zdravko-hristov-716920205

Professional Summary

Motivated and detail-oriented software engineer with experience in both modern web development and blockchain technologies. Strong foundation in front-end development and smart contract auditing, with the ability to build secure, scalable, and efficient solutions. Passionate about learning new tools, improving code quality, and contributing to high-impact projects.

Experience

Smart Contract Auditor (2 years)

- Performed security audits of smart contracts with a focus on identifying vulnerabilities and improving contract robustness.
- Worked with Solidity-based projects and used tools such as Foundry for testing and verification.
- Performed fuzzing using Echidna to uncover unexpected contract behaviors and strengthen contract security.
- Collaborated with development teams to propose fixes and enhance code quality.

Front-End Developer (1 year)

- Built responsive and user-friendly UI components using JavaScript, HTML, and React.
- Worked closely with designers and back-end developers to integrate front-end logic and improve performance.
- Used Git for version control and team collaboration.

Education

Bachelor's Degree – Software Engineering

Plovdiv University "Paisii Hilendarski"

High School – Software & Hardware Technologies

Focus on computer systems, programming fundamentals, and digital technologies.

Skills

- Web Development
- Blockchain Development & Security
- Smart Contract Auditing

Technologies

- Languages: HTML, JavaScript, Solidity
- Frameworks & Libraries: React
- Tools: Git, Foundry, Echidna
